Subject: RE: latest email

We're serious about crime too. Every day. Our office offered to pull a meeting together with you, neighbors police [chief if need be]. We were told "no" - this as of late Friday afternoon.

We want to to address this together. The "we can't trust the mayor" does not sound as if you want to do it together.

Tom will be calling you directly. In addition, I think you and your neighbors could earn a lot from other well organized community groups. Washington Heights has an extensive email tree and that includes the 3rd district captain. Issues are responded to very quickly. Given that my wife is on the board, I can offer assistance in hooking you up there.

Let me also say that I am concerned and confused by your reluctance to report the incident at your home and your unwillingness to discuss your concerns about "an inside job". Serious stuff that should be investigated by the proper authorities. How can we address people's concerns about the department without people coming forward?

Again, be assured that we will do everything we can to address the concerns about crime you and your neighbors have - That will require some face to face time with a number of individuals. I hope your conversation with Tom is a start to that process.
